

## LEAD Home Energy Advice Scheme

The Home Energy Efficiency Team at the City of York Council is pleased to announce its LEAD Home Energy Advice Scheme for owners of listed and conservation area properties.

If you're worried about rising bills, staying warm in your own home, or even lowering your carbon footprint, but don't know where to start, this scheme is for you.

The LEAD Home Energy Advice Scheme will provide York owners of conservation-area and listed properties with a detailed Advice Pack containing:

- A thorough insight into the current condition of your property and the best ways to keep your home healthy via insulation, renewable heating and ventilation.
- information on how to complete planning permission applications and gain listed property consent.
- information on current market prices, deals and grant schemes.
- Information on the most up-to-date technology available in the energy sector.

Our experienced advisors will also offer the installation of draughtproofing measures such as radiator foils, draughtproofing strips, loft-hatch insulation and LED lightbulb changes.

To benefit from this scheme, you must:

- Be an Owner Occupier or Landlord.
- Own a property within a York conservation area or own a listed property.
- have an Energy Performance Certificate (EPC) of D or below. If you do not know your Energy Performance Rating, please contact us and we will undertake a new EPC assessment for you.

Home surveys will commence in January 2024; if you believe yourself to be eligible, please contact the team via [saveenergy@york.gov.uk](mailto:saveenergy@york.gov.uk) and one of our advisors will be in touch to confirm a survey date and time.
